PROFILE

Frontend engineer with 8+ years of experience across Cognizant's Apple account and Capgemini's GE Aviation account. Builds maintainable Vue.js interfaces, reusable component systems and resilient API integrations. Combines hands-on engineering with stakeholder communication, code review and mentoring.

CORE SKILLS

Frontend: JavaScript (ES6+), Vue.js 2 & 3, React, HTML5, CSS, Vuex, Pinia, Vue Router, Bootstrap

Engineering: Frontend architecture, reusable components, responsive design, API integration, performance, accessibility

Delivery: Git/GitHub, Jenkins, Jira, Postman, Agile/Scrum, requirements, stakeholder alignment

Additional: Node.js, SQL; Docker and Kubernetes at a basic level

EXPERIENCE

Cognizant — Sr Software Associate

Nov 2021 – Present

Apple account · Bengaluru, India

- Lead frontend architecture and UI delivery across Apple's Core, VIMS, DMS and Columba platforms, collaborating with business, UX and backend stakeholders.
- Build modular Vue.js 2/3 interfaces and reusable components using Vuex, Pinia and Vue Router; translate business requirements into technical specifications and delivery plans.
- Define frontend-to-backend API contracts and integration requirements, facilitate Agile ceremonies and mentor a cross-functional team of 7+ engineers.
- Improved sprint velocity by 40% through process governance and code quality standards on the VIMS/DMS workstream.

Capgemini — Sr Analyst

Jul 2018 – Oct 2021

GE Aviation account · Bengaluru, India

- Built frontend features and reusable UI components for manufacturing nonconformance and product-change management platforms.
- Reduced initial load times by 15% through lazy loading, asset compression and caching.
- Contributed to CI/CD delivery, code quality and automated testing workflows while mentoring junior engineers.

EDUCATION

Master of Computer Application · Annamalai University · Jun 2019 – Dec 2021

Bachelor of Computer Application · KLE's RLSI · Jul 2015 – May 2018

Enterprise UI, delivered.

CORE · APPLE CUSTOMER SUPPORT

Apr 2025 – Present · Cognizant / Apple account

- Develop and maintain the Vue 3 application used by advisors to log customer tickets and issues.
- Use Radar reports to identify UI improvement areas, prioritize feature delivery and coordinate backend integration.
- Connect technical requirements, API contracts and Agile delivery across a cross-functional team.

VIMS & DMS · FACILITIES INTELLIGENCE

Oct 2023 – Mar 2025 · Cognizant / Apple account

- Architected responsive interfaces with Vue 3, Vuex and Vue Router for internal enterprise workflows.
- Served as a technical point of contact, translating stakeholder requirements into practical implementation plans.
- Strengthened component reuse, code review and delivery practices across multi-locale deployments.

COLUMBA · APPLE TV APPLICATION

Jul 2022 – Sep 2023 · Cognizant / Apple account

- Delivered frontend features from UX wireframes through production implementation.
- Built a reusable component library and coordinated the handoff between design and engineering.

GE AVIATION · NMS & PCM

Jul 2018 – Oct 2021 · Capgemini / GE Aviation account

- Developed components and frontend integrations for nonconformance and product-change workflows.
- Improved loading performance through targeted asset and caching changes.

RECOGNITION & ADDITIONAL WORK

Star Award for contribution to GE account platforms. iEvolve recognition for a reusable modal component adopted across GE project streams.

Personal projects include a fitness-coaching LLM agent and domain-specific query agents, with work on prompting, conversation flow and tool interfaces. These are personal experiments, separate from enterprise work.

Work authorization: India. Visa sponsorship required for employment outside India. Open to discussing remote contracting arrangements and international relocation.
